**MEMORANDUM**

**TO:** Ohio Antique Boiler Board

**FROM:** National Threshers Association Executive Board

**RE:** MAWP of Historical Boilers

After careful review of the draft proposal for the State of Ohio guide to attain maximum allowable working pressure for steam traction engines as proposed by the Ohio Antique Boiler Operators Association. The National Threshers Association, its officers, directors and safety committee endorse this proposal. We represent over 50 steam traction engines inspected in the State of Ohio. The Ohio Antique Boiler Operators Association draft provides a comprehensive inspection procedure for all antique boilers in the State of Ohio and we feel that this should be adopted by the Ohio Antique Boiler Board.
